

Dedicated SaaS

The EDWARD Dedicated SaaS version enables the EDWARD application suite to be hosted by a compatible service provider chosen by the customer company. The Dedicated SaaS offer allows you to benefit from the advantages of a SaaS service, while maintaining control over the security of your company's data and their geographical location.

Advantages of the dedicated SaaS solution

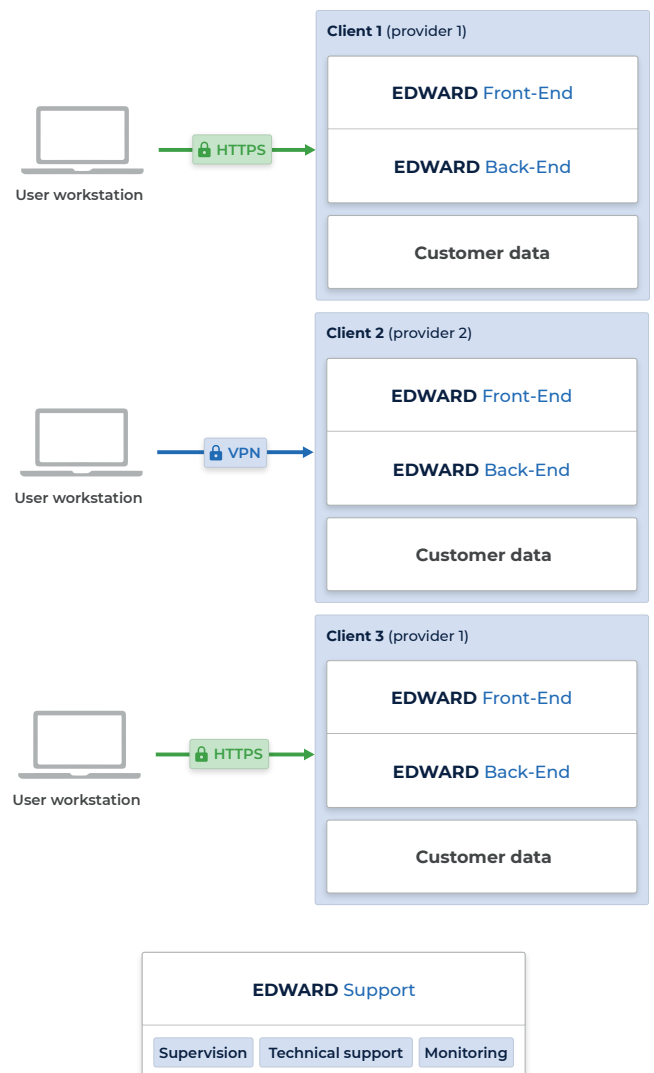

- The customer chooses the operator with whom they will host the application suite.
- The customer can choose how to size their servers according to their needs and thereby manage load scalability.
- The data are encrypted with the customer's own keys. They never come into contact with other customers' servers or data.

What the dedicated SaaS offer entails

- Regular software updates.
- Functional support for users.
- Technical support for the application.
- VPN installation is required to access EDWARD APIs.
- Access and use of the software require an internet connection.

Services provided by the EDWARD team

- Regular software updates.
- Functional support for users.
- Management of customer databases.
- Technical support for the application
